

144-core optical distribution box model

Overview

A ultra high-capacity Optical Distribution Frame (ODF) designed to terminate, organize, and manage up to 144 fiber optic cores.

Key Takeaways

144-core optical distribution boxes are high-capacity fiber management solutions designed for both indoor and outdoor FTTx networks, supporting up to 144 fiber connections with robust protection and flexible installation options.

A 144-core optical distribution box (ODF/ODCC) is used to connect, distribute, and manage fiber optic cables in large-scale networks, particularly for FTTx, FTTH, and access networks. These boxes provide centralized management for fiber connections, ensuring organized routing, protection, and easy maintenance of optical fibers .

Key Features

- Capacity: Supports up to 144 fiber cores, with some models offering modular expansion for 288 or 576 cores .
- Splitter Compatibility: Many models include space for PLC splitters (1:2, 1:4, 1:8, 1:16, 1:32) to facilitate signal distribution .
- Material and Durability: Constructed from stainless steel or cold-rolled steel, providing corrosion resistance, anti-theft protection, and durability in extreme weather conditions .
- Environmental Protection: Outdoor models often feature IP65-IP68 ratings, making them waterproof, dustproof, and suitable for harsh environments .

- **Fiber Management:** Includes features like double tray structures, bend radius protection (≥ 40 mm), clear labeling, and separate pigtail paths to prevent fiber damage and simplify maintenance .
- **Installation Options:** Can be wall-mounted, pole-mounted, or ground-mounted, offering flexibility depending on site requirements .
- **Additional Features:** Built-in grounding devices, direct splice units, and modular design for easy maintenance and capacity expansion .

Applications

- **FTTx Networks:** Ideal for connecting backbone cables to distribution cables in fiber-to-the-home or fiber-to-the-building deployments .
- **Telecom and ISP Networks:** Provides centralized management for large-scale optical networks, ensuring reliable connectivity and organized distribution .
- **Outdoor and Harsh Environments:** Designed to withstand extreme weather, UV exposure, and mechanical stress, making them suitable for outdoor installations .

Example Models

- **PAZ ODCC 144 Core:** Features 18 splitter spaces, 64 parking lots, rust-proof materials, and quality assurance certification .
- **SJ-ODB-M18-B:** Metal fiber distribution box with IP68 rating, suitable for indoor/outdoor use, wall or pole mounting .
- **Dawnergy 144-Core Steel Cabinet:** Modular design, plug-in splitters, IP65 protection, supports ribbon and non-ribbon cables .
- **KWGPX-144D:** MDF-based distribution box with double tray structure for efficient space utilization .
- **Wirenet-Tech 144-Core ODF:** Outdoor trunk interface device with direct splice units, grounding protection, and flexible fiber routing . These models provide high-capacity, durable, and flexible solutions for modern fiber optic networks, ensuring efficient management and protection of optical fibers.
