

Cable tray side height 200

Overview

The 200mm HDG cable tray is ideal for external use on rooftops, plant areas, or service zones where cable support is required in exposed environments. The compact 60mm x 60mm profile is perfect for smaller cable bundles while offering long-lasting weather protection. Height (often called side rail height or tray depth) controls vertical stacking capacity and influences NEC fill compliance and heat dissipation. In many cases, increasing width provides better airflow. Cable tray crossing 200 x 60 mm Practical crossing for cable trays with a width of 200 mm and a height of 60 mm. Made of sturdy material for secure installation. - Simple connection using 2 screws on each side (optional)- Material: metal-. This cable tray improves your cable management system by accommodating various cable types and sizes. Cables can be attached to the tray using tie-wraps and/or Velcro. The toolless mount plastic cable rings (A002K-000001-000-1) may also be fitted to this cable. Data Center Wire Mesh Cable Tray: Maximize airflow, simplify cable access & support EMI shielding. Manufactured from 4mm thick heavy gauge steel wire and finished with a hot dipped galvanised (HDG) coating, this tray offers excellent corrosion resistance for outdoor.
