

Certificate Cable Tray Prices in Canada

Overview

WESCO Canada Splicing Cable Trays: Type - Splice Plates; Tray Type - Cable Tray; Style-Construction - Straight Standard; Tray Siderail Height - Cable Tray |.

Key Takeaways

Certified cable trays in Canada are available from multiple suppliers, with prices typically provided via direct quotes due to customization, material, and length variations. Overview of Certified Cable Trays

Certified cable trays in Canada are generally CSA or UL approved, ensuring compliance with safety and quality standards. These trays are suitable for power, control, data, and telecom cables, and come in various types including aluminum ladder trays, wire mesh trays, channel trays, and one-piece small cable trays. Suppliers often offer standard lengths of 3m, 5m, and 6m, with custom lengths available for specific projects.

Leading Suppliers

- Superior Tray Systems Inc: Offers CSA and UL certified cable trays, including wire mesh and channel trays for sensitive or fiber optic cables. They provide custom-engineered solutions for industrial and commercial installations.
- Unitray: Manufactures CSA-approved Class C, D, and E aluminum cable trays and fittings. They also supply the FASTRAY® system, which is designed to reduce installation time and labor costs. Pricing is available upon request, and they provide technical specifications and installation guides.

- WESCO Canada: Offers a wide range of aluminum cable trays, splice plates, covers, and end closures. Pricing and availability require creating an account or requesting a quote, reflecting the variability in tray type, size, and material .
- Canadian Electrical Raceways (CER): Provides CSA-approved cable trays, ducts, and wire mesh trays, emphasizing quality and innovation for over 30 years in the Canadian market .

Pricing Considerations

Cable tray prices in Canada vary based on several factors:

- Material: Aluminum trays are common and generally more cost-effective than stainless steel or specialized coatings.
- Type: Ladder, wire mesh, and channel trays have different manufacturing costs.
- Length and Size: Standard lengths (3m, 5m, 6m) are easier to price, while custom lengths or widths may increase costs.
- Accessories: Covers, splice plates, end closures, and mounting hardware add to the total price.
- Certification: CSA or UL certification may slightly increase cost but ensures compliance with Canadian electrical standards. Because of these variables, suppliers typically provide custom quotes rather than fixed online prices. Contacting suppliers directly is the most reliable way to obtain accurate pricing for your project.

Recommendations

- Request Quotes: Contact Superior Tray Systems, Unitray, or WESCO Canada with your project specifications to get detailed pricing.
- Specify Certification: Ensure the trays are CSA or UL certified if required for compliance.
- Consider Installation Efficiency: Systems like FASTRAY® can reduce labor costs and installation time.
- Compare Suppliers: Evaluate multiple suppliers for cost, delivery time, and technical support. By following these steps, you can obtain competitive pricing for certified cable trays in Canada while ensuring compliance and quality .
