

Contact information for the third-level distribution box

Overview

Tertiary Distribution Box: The final connection box for each electrical appliance, which can be movable or fixed.

Key Takeaways

Third-level distribution boxes are the final junction boxes in a three-level electrical distribution system, and contact information is typically obtained through manufacturers or authorized distributors. Understanding Third-Level Distribution Boxes

The third-level distribution box is the switch box at the end of a power distribution system, directly supplying electrical equipment. It is installed under the second-level distribution box and can be either fixed or movable. These boxes often include the final leakage protection switch and are designed according to the power consumption plan of the project .

Key Suppliers and Manufacturers

Several companies provide third-level distribution boxes suitable for industrial and construction applications:

- Wieland Electric: Offers robust distribution boxes for decentralized electrical installations, including pluggable and configurable solutions for energy, signal, and data distribution . They provide technical support and project-specific consultation.

- Phoenix Contact: Provides sensor/actuator distributor boxes with M12 push-pull or M23 plug-in connections, fully molded distributors, and tool-free installation options . They also offer guidance for self-assembly and replacement.

- Legrand: Supplies three-level distribution systems with options for standard, optimized, and increased safety configurations, compatible with XL3 cabinets .

How to Obtain Contact Information

To get direct contact information for a third-level distribution box:

- Visit the Manufacturer's Website: Most suppliers have dedicated contact pages for sales, technical support, and distributors.

- Wieland Electric: <https://>

- Phoenix Contact: <https://>

- Legrand: <https://>

- Locate Authorized Distributors: Many manufacturers list certified distributors by region, which can provide local sales and technical support.

- Request Technical Support or Sales Inquiry: Use online forms or email addresses provided on the manufacturer's site to request product specifications, pricing, or installation guidance.

- Consult Project-Specific Documentation: For construction projects, the electrical contractor or project engineer often has the supplier contact details for the installed third-level distribution boxes. By following these steps, you can obtain the necessary contact information for procurement, installation, or technical support of third-level distribution boxes.
