

Explosion-proof electric heat tracing terminal box

Overview

These boxes are designed to protect electrical connections and are typically Ex-proof, suitable for use in areas with explosion risks. At Ignis Trace, we are a leader. * Enclosure dimension (mm): 120*122*98,130*130*120,220*130*120,260*180*120,300*220*120,300*220*160,360*220*120,360*220*160, 420*300*160,420*300*220,720*420*160,720*420*220 *Used in chemical, oil refining, oil exploitation, offshore oil platforms, oil tankers, military and other hazardous areas. Safely conduct, connect and distribute energy in hazardous areas with R. We offer bespoke, custom-made terminal boxes and terminal box combinations, as well as standard products with short delivery times. Our products are certified for installation technologies all over the. The PTBS-GET-120 series explosive-proof junction box is used to connect the power end with Protrace self-regulating trace heating cable products HTLe,HTR,HTP,and HTS. This series of junction boxes is certified for use in designated hazardous areas.
