

Explosion-proof network cabinets in stock

Overview

Explosionproof & Dust-Ignition Proof Enclosures Adalet offers the most extensive line of industrial enclosures for hazardous and rugged industrial applications.

Key Takeaways

Explosion-proof network cabinets are available from multiple suppliers, offering ATEX/IECEx-certified enclosures suitable for hazardous areas, with options for standard rack-mounted IT equipment and industrial control systems. Key Suppliers and Options

1. PLC-City PLC-City offers stainless steel explosion-proof enclosures with IP65 protection, designed for installation of ET 200iSP modules and AirLineEx pneumatic components. Sizes range from 650x450x230 mm to 950x450x230 mm, supporting up to 25 I/O modules. Cable entry options include M16, M20, and M32 fittings, and the enclosures operate in ambient temperatures from -40°C to +70°C depending on the model . 2. Hexlonex Hexlon provides explosion-proof electrical and distribution cabinets certified to IECEx and ATEX standards, suitable for Zone 1 and Zone 2 hazardous environments. These cabinets are ideal for safely housing electrical and network equipment in industrial settings . 3. R. STAHL EXpressure Cabinets EXpressure cabinets feature innovative stainless steel wire mesh walls that dissipate explosion pressure and heat, reducing internal pressure to less than 1 bar. They are lightweight, future-proof, and compatible with digital industrial electronics, including routers, switches, LTE/5G devices, and protocol converters. These cabinets are designed for flexible retrofitting and upgrading without major conversion work . 4. Adalet Adalet offers a broad range of explosion-proof and dust-ignition-proof enclosures, including standard stock and customizable options. Their enclosures meet NEMA type 1 through type 13 standards and are suitable for rugged industrial applications. They provide a variety of fittings, accessories, and instrument housings, ensuring compliance with domestic and international safety standards . 5. RSP Supply While RSP Supply primarily focuses on network cabinets for IT and industrial control equipment, their enclosed systems can be adapted for secure housing in hazardous areas when combined with explosion-proof modifications. Cabinets support standard 19-inch rack-mounted equipment, cable management, cooling, and power distribution .

Considerations When Choosing Explosion-Proof Network Cabinets

- **Certification:** Ensure ATEX, IECEx, or NEMA compliance for your specific hazardous zone.
- **Material and Protection:** Stainless steel or other durable materials with IP65 or higher for dust and water resistance.
- **Size and Capacity:** Match the cabinet dimensions and module capacity to your networking or control equipment.
- **Cable Management:** Adequate entry points and internal routing for power, data, and signal cables.
- **Temperature Range:** Verify ambient operating temperature suitability for your environment.
- **Future Expansion:** Consider modular or retrofittable designs for digital upgrades and additional equipment. These suppliers provide ready-to-ship stock as well as options for customization, ensuring that you can secure explosion-proof network cabinets that meet both safety and operational requirements.
