

Fiber Optic Cable Identification Sign Size Aluminum Alloy

Overview

Electrical Underground Sign Our NEW AL-Plus Aluminum is a rigid and durable aluminum composite Underground Fiber Optic Cable Sign Order a high-quality Unde.

Key Takeaways

Aluminum fiber optic cable identification signs are commonly available in sizes ranging from 7" x 10" to larger custom dimensions, made from durable aluminum alloy for long-term outdoor use. Standard Sizes and Materials

Aluminum fiber optic cable signs are typically offered in multiple standard sizes to suit different installation needs. Common dimensions include 7" x 10" and 12" x 18", with some manufacturers providing up to six size options for flexibility (). These signs are made from rigid aluminum or aluminum composite (AL-Plus), which consists of two sheets of aluminum laminated to a thermoplastic core, providing extra stiffness and durability for outdoor environments ().

Thickness and Durability

- Standard aluminum signs are often 63 mil thick, which ensures they do not bend easily and can withstand harsh weather conditions ().
- AL-Plus aluminum signs are designed to last up to 10 years outdoors, resistant to UV, chemical, abrasion, and moisture ().

- Many signs feature a laminated surface to protect graphics from weather, graffiti, and general wear ().

Mounting and Installation

- Signs typically come with pre-punched holes in each corner for easy mounting on posts, walls, or fences ().

- Rounded and burr-free corners are standard for safe handling and professional appearance ().

- Some signs also offer self-adhesive backing for direct application to clean, dry surfaces ().

Customization Options

- Many suppliers provide custom printing, including company logos, numbering, or color coding ().

- Signs can be made in plastic, magnet, or laminated aluminum depending on the installation environment ().

- For high-density or specialized installations, engineer-grade tags and labels are available to fit specific cable diameters or identification requirements (). In summary, aluminum alloy fiber optic cable signs are available in standard sizes like 7" x 10" and 12" x 18", with durable construction, laminated surfaces, and multiple mounting options, making them suitable for long-term outdoor and industrial use ().
