

Fiber Optic Cable Outdoor Cabinet Price

Overview

Amazon.com: Outdoor Fiber Optic Cable Industrial-grade outdoor fiber optic cables with armor protection. Multiple configurations for long-distance transmiss.

Key Takeaways

Fiber optic outdoor cabinets typically range from \$200 to \$2,000 or more depending on capacity, material, and features. Pricing Overview

The cost of fiber optic outdoor cabinets varies widely based on capacity, material, and design:

- Small FTTH wall-mounted cabinets (12-48 cores): Usually priced around \$200-\$500. These are suitable for small nodes or residential deployments and are often made of cold-rolled steel or durable plastic with basic waterproofing (IP55) .
- Medium distribution cabinets (96-288 cores): Prices typically range from \$500-\$1,200. These cabinets are designed for street-level or access network applications, often featuring stainless steel or anti-corrosion coatings for durability .
- Large cabinets (288-576 cores): Can cost \$1,200-\$2,000+, especially if they include splitters, splicing trays, and high-capacity adapters. These are used in regional networks or major hubs where multiple fibers converge .

Factors Affecting Price

- Material and Build Quality: Stainless steel or anti-corrosion coatings increase longevity and cost. SMC or reinforced plastic cabinets are lighter and cheaper but may have lower mechanical protection .

- **Capacity:** Cabinets with higher fiber core capacity (144, 288, 576 cores) are more expensive due to larger size and additional splicing trays .
- **IP Rating and Weatherproofing:** Outdoor cabinets with IP55–IP65 protection against water and dust are essential for street deployment, which can increase cost .
- **Included Accessories:** Cabinets with pre-installed splitters, adaptors, or splicing trays are more expensive than empty housings .
- **Supplier and Region:** Prices vary by supplier and shipping location. Bulk orders may reduce per-unit cost .

Examples from Suppliers

- **ALLO FDC 144-288 Fiber Optic Distribution Cabinet:** IP55 waterproof, supports 144–288 fibers, with 12 SC/FC adaptors per tray. Pricing is typically in the \$500–\$1,000 range depending on configuration .
- **Alibaba Bulk Outdoor Cabinets:** Offer 144/288/576 core cabinets with waterproof design, suitable for PON networks. Prices vary widely based on quantity and customization .
- **ETL and DCD Distribution:** Provide a range of outdoor cabinets and pedestals for FTTH projects, with pricing dependent on port count and material .

Conclusion

For planning purposes, expect to budget \$200–\$500 for small residential cabinets, \$500–\$1,200 for medium distribution cabinets, and \$1,200–\$2,000+ for large high-capacity outdoor cabinets. Always consider material, IP rating, and included accessories when comparing prices to ensure durability and suitability for your network deployment.
