

Fiber Optic Junction Box Distributor

Overview

Find Corning authorized distributors and installers. Find information on our carrier or enterprise network distributors here.

Key Takeaways

Fiber optic junction boxes are available from specialized distributors like OTRANS, EFB-Elektronik, and TopFiberBox, offering indoor and outdoor solutions for FTTH and FTTx networks. Key Distributors and Offerings

1. OTRANS OTRANS provides a wide range of fiber distribution boxes (FDB) and optical distribution frames (ODF) suitable for indoor and outdoor FTTx deployment. Their products cover 1-24 core capacities and include integrated solutions such as optical splitters, junction boxes, and terminal boxes. OTRANS boxes are made from high-impact ABS+PC materials, ensuring durability, mechanical protection, and IP65-rated waterproofing. They offer versatile mounting options for walls, poles, or cabinets, making them suitable for data centers, commercial buildings, and external network nodes .

2. EFB-Elektronik EFB-Elektronik specializes in splice boxes and optical network terminal boxes for FTTH networks. Their splice boxes manage incoming and outgoing fiber cables, maintaining proper strain relief, bend radius, and organization. They are designed for harsh environmental conditions, providing long-term durability and protection for fiber splices. EFB-Elektronik also offers accessories like module racks, subracks, and termination boxes, with online ordering available .

3. TopFiberBox TopFiberBox offers 12-port FTTH fiber distribution boxes designed for connecting feeder and drop cables in multi-dwelling units, commercial buildings, and villas. These boxes integrate fiber splicing, storage, signal splitting, termination, and cable management into a single unit. They support PLC splitter installation, up to 20-core fiber splicing, and feature IP65-rated waterproof enclosures suitable for wall-mounted or pole-mounted installations. The dual-layer design separates splicing, wiring, and distribution for organized operation .

Features to Consider

- Capacity: Choose boxes based on the number of fibers (1-24 cores or more).
- Environment: Indoor vs. outdoor, with IP-rated protection for weather resistance.
- Mounting Options: Wall, pole, or cabinet installation depending on network layout.
- Splitter Support: Some boxes support PLC splitters for signal distribution.
- Material and Durability: High-quality plastics or polycarbonate for impact and UV resistance.
- Ease of Installation: Pre-terminated pigtails, reversible trays, and adapter slots simplify deployment. These distributors provide comprehensive solutions for FTTH and FTTx networks, ensuring reliable fiber management, protection, and efficient signal distribution. Choosing the right distributor depends on your network size, environmental conditions, and installation requirements.
