

Honduras Outdoor Distribution Box Models and Specifications

Overview

Waterproof Distribution Boxes for Electrical | WZMDBOX Manufacturer & Exporter of Junction Boxes, Electrical Boxes, Plastic Enclosures, Waterproof Distribut.

Key Takeaways

Outdoor distribution boxes suitable for Honduras include IP65-rated ABS and AC/DC boxes, with configurations ranging from 4-way to 54-way, designed for weatherproof and durable electrical distribution. IP65 Distribution Boxes (SHA Series)

The SHA series IP65 distribution boxes are designed for outdoor use, offering dustproof and waterproof protection. They are available in 4-way to 54-way configurations, making them suitable for residential, commercial, and photovoltaic applications. These boxes are widely used in solar energy systems and construction projects, providing reliable energy distribution under harsh environmental conditions.

ABS Waterproof Distribution Boxes

12-way ABS distribution boxes feature a fully insulated shell with a transparent gray cover for easy monitoring of switch status without opening the lid. They are IP65-rated, protecting against rain, snow, and dust, and are suitable for both indoor and outdoor installations. Typical dimensions for a 12-way box are 255 x 200 x 110 mm, and they are compatible with DIN rail-mounted circuit breakers.

Portable Power Distribution Units

For temporary or mobile applications, Lex Products offers portable power distribution boxes ranging from 20 to 800 Amps. These units are engineered for industrial, military, and entertainment use, with adjustable circuit breakers and compact, rugged designs. Outdoor models, such as the PowerRACK™ Slim Combo, include multiple 50A California-style devices, L21-20 twist-lock receptacles, and adjustable breakers for flexible power distribution .

AC Distribution Boxes for Solar Applications

AC distribution boxes (ACDBs) are used to receive AC power from solar inverters and distribute it to AC loads. They are weatherproof and insulated, with secure wiring and optional MC4 terminal connectors. These boxes comply with IEC/IS standards, ensuring safety and reliability for outdoor solar installations .

Key Specifications to Consider

- Material: ABS plastic or weatherproof metal for durability
- IP Rating: IP65 for dust and water protection
- Configuration: 4-way to 54-way for SHA series; 12-way for standard ABS boxes
- Mounting: Wall-mounted or DIN rail compatible
- Applications: Solar PV systems, residential and commercial power distribution, portable events, and industrial setups
- Environmental Resistance: UV, rain, snow, and dust protection These models provide a range of options for Honduras' outdoor electrical distribution needs, from permanent solar installations to portable power setups for events or industrial sites.
