

Inquire about pricing for complete electrical distribution boxes in Singapore

Overview

DB Box Services Singapore | Distribution Board Installation & Upgrade. DB box upgrade costs in Singapore typically start from \$350 for a residential prop.

Key Takeaways

Complete electrical distribution boxes in Singapore typically cost between SGD 150 and SGD 800, depending on type, capacity, and installation requirements. Overview of Distribution Box Costs

The price of a basic HDB distribution board (DB) box generally starts around SGD 150–300 for standard single-phase units, which include circuit breakers and residual current devices (RCDs) for safety. For larger or three-phase DB boxes, commonly used in industrial, commercial, or larger residential properties, prices can range from SGD 400 to SGD 800 or more, depending on the number of circuits and the brand.

Installation Costs

Professional installation is strongly recommended in Singapore, as DB boxes must comply with EMA regulations and safety standards. Installation costs vary based on complexity:

- Simple replacement or upgrade of an existing DB box: SGD 150–400

- New installation in a new property or major renovation: SGD 300–700, including wiring, circuit division, and safety testing Some suppliers, such as Eezee and Ban Soon Hardware, offer product quotations and next-day delivery, while electrical service providers like Lito Electrical Services and LS Electrician Singapore provide full installation packages with professional wiring and safety compliance .

Factors Affecting Price

- Type of DB Box: Single-phase vs. three-phase, metal vs. plastic enclosure.
- Number of Circuits: More circuits require larger boxes and more breakers.
- Brand and Quality: Premium brands with higher durability or smart features cost more.
- Installation Complexity: Rewiring, concealed installation, or adding extra circuits increases labor costs.
- Additional Features: Smart switches, surge protection, or customized covers can add to the total cost .

Typical Budget for Residential Properties

For a standard HDB flat, a complete DB box replacement or upgrade including installation usually falls between SGD 300 and SGD 600. For condos or landed properties requiring larger capacity or three-phase systems, the total cost can reach SGD 700–800 . By obtaining quotes from multiple suppliers and licensed electricians, homeowners can ensure both safety compliance and cost efficiency.
