

Intelligent Fiber Optic Distribution Frame lc

Overview

The ODF Fiber Optic Distribution Frame LC/UPC-96core is a high-density optical fiber management solution developed for telecommunications operators, system integrators, and FTTH network projects. The FIU2117/FTU2114 can be installed in 19 inch or 21 inch integrated cabinets with depth greater than or equal to 300 mm to implement fiber termination, or integrated fiber splicing and termination. Designed by Fenxi Optoelectronics Technology, this distribution frame integrates fiber termination. Achieve successful cable management, handle high amounts of fiber cable and add density to fiber frames with the new DCX Optical Distribution Frame (ODF) System which features innovations like flippable cassettes, modular frame design and multiple configuration options. When fully loaded with EDGE 4U housings the optical distribution frame dual-frame model provides a total capacity of 5,760 LC Duplex or MTP ports / 11,520 LC Simplex ports while the single-frame. NORDEN Fibre optic distribution frame is a high-capacity, high-density fibre distribution frame, suitable for the composition and distribution of fibres in optical access network to achieve the fibre optic lines connection, distribution and scheduling. It is made of top quality steel and deformed. ODF is used in the terminal access link of FTTH system.
