

Palestinian Monitoring and Distribution Box Manufacturer

Overview

Box Assistant is a packaging manufacturer passionately dedicated to its clients and their products, with a focus on innovation.

Key Takeaways

SunBox and local distributors provide monitoring and distribution box solutions in Palestine, including solar-compatible and modular electrical systems. Key Manufacturers and Providers

SunBox is a notable provider in Gaza, offering affordable, off-grid, self-installable mini solar kits designed to address frequent electricity shortages. Their kits are compatible with local electrical outlets and voltages, and they include modular components that allow families to manage power distribution efficiently. SunBox has supplied systems to over 800 families and collaborates with local banks and organizations to make the kits accessible through installment plans and subsidies (SunBox, 2026) .

Local Distributors and Importers: While specific large-scale manufacturers of traditional power distribution boxes in Palestine are limited, companies like Zalmout Distribution Company import high-quality electrical products from international suppliers, including Turkey, and may provide distribution boxes and related electrical infrastructure solutions (Zalmout, 2026) . These distributors often offer modular and industrial-grade solutions suitable for commercial and residential applications.

International Sourcing: For specialized or heavy-duty power distribution boxes, Palestinian businesses often rely on imported products from manufacturers such as Nijsha Enterprise, which produces modular, safe, and durable distribution boxes for industrial and commercial use. These boxes include advanced safety features like circuit breaker protection and surge protection, which can be integrated into local electrical systems (Nijsha Enterprise, 2026) .

Considerations for Procurement

- **Compatibility:** Ensure that distribution boxes meet local voltage and electrical standards. Solar-compatible kits like SunBox are designed specifically for Gaza's grid conditions.
- **Modularity:** Modular designs allow for future expansion or customization of circuits.
- **Safety Features:** Look for boxes with ground fault protection, circuit breakers, and surge protection to comply with safety regulations.
- **Local Support:** Partnering with local distributors or companies like Zalmout can provide installation support, maintenance, and warranty services.

Summary

For monitoring and distribution boxes in Palestine, SunBox offers solar-compatible, modular solutions for residential and small-scale commercial use, while local distributors like Zalmout can provide imported industrial-grade boxes. For larger or specialized installations, international manufacturers such as Nijsha Enterprise supply heavy-duty, modular distribution boxes suitable for integration into Palestinian electrical infrastructure. These options ensure reliability, safety, and adaptability to local energy conditions.
