Key Takeaways

The price of a 32-circuit distribution box typically ranges from \$150 to \$500, depending on specifications, brand, and features.Overview

A 32-circuit distribution box, also known as a breaker box or distribution board, is used to safely distribute electrical power across multiple circuits in residential, commercial, or industrial settings. Prices vary based on current rating, phase type, waterproofing, and brand .

Price Range

- Retail options: Standard 32-circuit breaker boxes for home or light commercial use are generally priced between \$150 and \$300 at stores like Home Depot .
- Industrial or waterproof models: Heavy-duty or IP65/IP67 rated boxes suitable for outdoor or industrial use can cost \$300 to \$500 or more, especially if they include features like multiple Schuko outputs, 32A capacity, or modular terminals .
- Wholesale or bulk purchases: Manufacturers like GEYA or Alibaba suppliers offer customizable 32A distribution boxes at lower per-unit costs for bulk orders, but shipping and import fees may apply .

Factors Affecting Price

- Voltage and current rating: Higher-rated boxes (e.g., 32A, 400V) are more expensive.

- Phase type: Single-phase boxes are cheaper than three-phase models.
- Enclosure type: Waterproof or IP-rated enclosures increase cost.
- Brand and certification: Certified brands with safety approvals may carry a premium.
- Accessories: Additional features like modular terminals, surge protection, or built-in meters can raise the price.

Purchasing Tips

- Compare retail vs wholesale options depending on quantity.
- Check IP rating if the box will be used outdoors or in damp environments.
- Ensure the box meets local electrical codes and safety standards.
- Consider delivery and installation costs, which may add to the total expense . By considering these factors, you can select a 32-circuit distribution box that fits both your budget and technical requirements.
