

Price of a complete set of residential electrical distribution boxes

Overview

New Panel Box Cost Guide 2026 – LatestCost – Real-Time Price The cost of a new panel box depends on the box size, meter/branch requirements, enclosure type.

Key Takeaways

A complete residential electrical distribution box typically costs between \$450 and \$1,500, including the panel, breakers, wiring, and professional installation. Cost Breakdown

The total price of a residential distribution box depends on several factors:

- **Panel Size and Amperage:** Standard homes usually require 100–200 amp panels. Higher amperage panels cost more due to larger enclosures and additional breakers .
- **Enclosure Material:** Options range from basic ABS plastic to powder-coated steel or high-grade stainless steel. Stainless steel units are more expensive but offer better durability, especially in humid or corrosive environments .
- **Internal Components:** The cost increases with the number and quality of circuit breakers, surge protectors, and busbars. Empty panels are cheaper, but a fully equipped box can significantly raise the price .
- **Labor and Installation:** Professional installation is essential for safety and code compliance. Labor costs vary by region, with urban areas and the Northeast U.S. generally higher than the South or Midwest .

- Additional Features: Smart breaker panels, sub-panels, or outdoor-rated enclosures may add to the cost .

Typical Price Ranges

- Basic Replacement (100–125 amp): \$450–\$800 including parts and labor .
- Standard Residential Upgrade (150–200 amp): \$800–\$1,500 depending on complexity and labor .
- High-End or Specialized Panels: \$1,500–\$1,900 for premium materials, smart panels, or extensive circuit configurations .

Additional Considerations

- Longevity: High-quality panels can last 25–40 years, though breakers may need replacement every 10–15 years .
- DIY Installation: Not recommended due to safety, insurance, and code compliance issues .
- Future Expansion: Choosing a panel with extra spaces for breakers can save costs if you plan to add circuits later . In summary, budgeting \$450–\$1,500 for a complete residential distribution box is typical, with the final cost influenced by amperage, materials, internal components, labor, and regional factors.
