

Price of modular distribution boxes

Overview

Modular Distribution Board Shop for Modular Distribution Board at Walmart.com. Save money. Live better. Distribution Box Cost Guide: Value & FeaturesExplor.

Key Takeaways

Modular distribution boxes typically range from \$50 to \$500 or more, depending on capacity, features, and brand.Overview of Pricing

The cost of modular distribution boxes varies widely based on number of modules, material, safety features, and expandability. Standard residential units with 16- or 32-module options generally start around \$50-\$150, while larger or commercial-grade units with advanced features can exceed \$300-\$500 per box . Premium brands like Panasonic offer modular boxes with flame-retardant materials, IP40 protection, and customizable covers, which can increase the price but provide enhanced safety and durability .

Factors Affecting Cost

- **Module Capacity:** Boxes with more modules (16, 32, or expandable systems) cost more due to higher material and design complexity .
- **Material and Build:** Flame-retardant plastics, ABS enclosures, and polycarbonate lids add to durability and safety, influencing price .
- **Safety and Compliance:** IP ratings, fire resistance, and compliance with electrical codes can increase costs, especially for outdoor or industrial applications .

- **Modularity and Expandability:** Modular systems allow adding circuits for solar panels, EV chargers, or future expansion without rewiring, which adds value but also raises the initial investment .

- **Smart Features:** Some modern boxes include monitoring, surge protection, and remote control capabilities, which can significantly increase the price .

Typical Applications

- **Residential:** Small to medium modular boxes for apartments or houses, usually 16-32 modules.

- **Commercial/Industrial:** Larger modular units with higher amperage, multiple circuits, and advanced monitoring features.

- **Outdoor Installations:** Weatherproof or IP-rated boxes for external use, often at a premium price .

Summary

When budgeting for modular distribution boxes, expect basic residential units around \$50-\$150, mid-range commercial units \$200-\$350, and high-end or smart modular systems \$400-\$500+. Prices are influenced by capacity, material, safety features, and expandability, making it important to select a box that meets both current and future electrical needs .
