

Price of small busbar on top of switchgear cabinet

Overview

Bus Bars | McMaster-Carr Choose from our selection of bus bars, including over 650 products in a wide range of styles and sizes. Same and Next Day Delivery.

Key Takeaways

The price of a small busbar for low-voltage switchgear cabinets typically ranges from \$50 to \$200 per unit, depending on material, size, and supplier. Pricing Overview

Small busbars are generally made of copper or aluminum, with copper being more expensive but offering higher conductivity and durability, while aluminum is lighter and 30–50% cheaper for equivalent ampacity. For low-voltage switchgear cabinets, suppliers like Greenpower offer small busbars with delivery times of 3–30 days after order confirmation. Prices vary based on the busbar's length, thickness, and number of poles, as well as any additional insulation or mounting accessories.

Material and Form Factor Considerations

- Copper Busbars: Higher cost, excellent conductivity, long-term reliability.
- Aluminum Busbars: Lower cost, lighter, easier to handle, but requires careful surface preparation to prevent oxidation.
- Flat Busbars: Most common and cost-effective for standard switchgear.

- Solid or Laminated Busbars: Used for higher mechanical strength or sensitive equipment, which can increase the price .

Supplier Options

- Greenpower (Made-in-China): Offers small busbars for low-voltage MNS cabinets with international shipping and packaging options like vacuum-sealed plywood cases .

- McMaster-Carr: Provides a wide range of busbars suitable for switchboards and battery banks, with same-day or next-day delivery for certain sizes .

- Rittal RiLine Systems: Modular busbar systems for top-mounting on switchgear, rated up to 2100 A, with tool-free installation and contact hazard protection .

Additional Considerations

- Ensure the busbar is rated for the current load of your switchgear.
- Check installation compatibility with your cabinet type (top-mounted or internal).
- Factor in shipping, customs, and handling costs if ordering internationally. In summary, for a small busbar on top of a low-voltage switchgear cabinet, expect a unit price between \$50 and \$200, with variations depending on material, size, and supplier, while ensuring compliance with electrical standards and safe installation practices .
