

Recommended Fiberglass Cable Tray Companies

Overview

Selecting the right fiberglass cable tray manufacturer is essential for ensuring the longevity and safety of your electrical systems.

Key Takeaways

Top fiberglass cable tray manufacturers include Friedrichs, Hallas Fiberglass, L-com Global Connectivity, Cablofil, Ideal Industries, ALOIS Composites, Oglaend System Group, Enduro Composites, MP Husky, and Uniflex. Leading Manufacturers and Their Strengths

Friedrichs is recognized for high-quality trays designed to withstand harsh environments, making them ideal for chemical processing, wastewater treatment, and oil and gas industries, with a focus on safety and performance . Hallas Fiberglass produces lightweight yet robust trays that meet rigorous industry standards, offering both off-the-shelf and custom solutions for residential, commercial, and industrial projects . L-com Global Connectivity provides trays with superior strength and performance, suitable for data centers and telecommunications installations, emphasizing sustainability and a wide range of configurations . Cablofil specializes in industrial applications, focusing on ease of installation and maintenance without compromising durability, and provides extensive customer education . Ideal Industries combines advanced materials with innovative designs, ensuring reliable fiberglass cable trays for various electrical installations . ALOIS Composites is a European leader known for pultruded fiberglass-reinforced trays tailored for corrosive environments, serving chemical plants, offshore platforms, and power utilities . Ogleand System Group supplies global solutions for oil & gas, marine, and industrial sectors, offering corrosion-resistant and fire-retardant trays suitable for extreme conditions . Enduro Composites dominates the North American market, providing trays with exceptional dielectric properties and high strength-to-weight ratios, ideal for utilities, transportation, and coastal installations . MP Husky offers trays with steel-equivalent load capacity, non-conductive, non-magnetic, and corrosion-resistant properties, available in polyester and vinyl ester resin systems, meeting ASTM E-84 and D-635 standards . Uniflex provides fiberglass trays tested in offshore oil and gas environments, with high strength-to-weight ratios, corrosion resistance, and custom manufacturing options, suitable for extreme conditions .

Key Considerations

When selecting a manufacturer, consider:

- Material and resin type (polyester vs. vinyl ester)
 - Load capacity and strength-to-weight ratio
 - Compliance with fire and corrosion standards (ASTM E-84, D-635)
 - Customization options for specific industrial or offshore applications
 - Reputation and customer support for installation guidance and long-term reliability
- These manufacturers are recognized globally for producing durable, high-performance fiberglass cable trays suitable for industrial, commercial, and infrastructure projects, ensuring safety, longevity, and compliance with industry standards.
