

SC adapter inspection standards

Overview

This article will describe the steps required to successfully certify a singlemode SC/APC to SC/APC duplex fibre link in accordance with ISO/IEC 14763-3 using the DTX-SFM2 fiber adapters. This standard permits two methods, a 1 Jumper and 3 Jumper Reference Method. The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies. The technical content of IEC publications is kept under constant review by the IEC. Please make sure. International IEC standards define precise specifications for various fiber optic connector types, which serve as the basis for well-founded selection decisions by system integrators and installers. Especially for data centers, public utilities and network operators, knowledge of current IEC. AMM offers LSH/E-2000 adapters in different variations. Only high quality and high precision material are used to guarantee connections at the highest level.
