

Sales of steel plates for cable trays

Overview

Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Same and Next Day Delivery.

Key Takeaways

Steel plates for cable trays, including mounting plates and fish plates, are widely available from UK and European suppliers, manufactured in durable steel with various finishes for industrial and commercial applications. Types of Steel Plates for Cable Trays

1. Mounting Plates: These plates are used to secure electrical boxes or other components to cable trays and ladders. They are typically made from steel or aluminum, often powder-coated for corrosion resistance and durability. Mounting plates come in various sizes and shapes, with pre-drilled holes for easy installation, and are designed to withstand specific load capacities depending on the project requirements . 2. Fish Plates: Fish plates are used to strengthen joints between lengths of cable tray or to connect trays to accessories. They are usually manufactured from pre-galvanised mild steel to ISO EN 10142 standards, with a typical gauge of 1.5mm. Fish plates ensure structural integrity and secure connections in cable management systems .

Suppliers and Availability

- CEF offers a range of steel cable trays suitable for heavy loads and harsh environments, providing durable support for cables in industrial and commercial setups .

- voestalpine Metsec supplies UK-manufactured cable tray systems, including mild steel pre-galvanised and hot-dip galvanised options, as well as stainless steel made to order. They provide a full design service, CAD drawings, and bespoke systems with high on-time delivery performance .
- ETS Cable Components specializes in pre-galvanised fish plates and other steel accessories for cable trays, with technical specifications available on request .
- Armorduct Systems Ltd manufactures a wide range of steel cable management products, including trays, baskets, and bespoke solutions, all produced in-house in the UK .

Considerations for Purchase

- Material and Finish: Choose between mild steel, pre-galvanised, hot-dip galvanised, or stainless steel depending on environmental exposure and load requirements.
- Dimensions and Load Capacity: Ensure plates match the cable tray width, depth, and expected load.
- Installation Requirements: Pre-drilled holes and compatible fasteners simplify mounting and reduce installation time.
- Compliance: Many suppliers conform to BS EN 61537 standards for cable tray systems, ensuring safety and reliability . Steel plates for cable trays are readily available from multiple suppliers, with options for standard sizes or bespoke solutions to meet specific project needs. Buyers can request technical datasheets, CAD drawings, and sample approvals to ensure compatibility and performance.
