

Saudi Arabian metal cable tray manufacturer

Overview

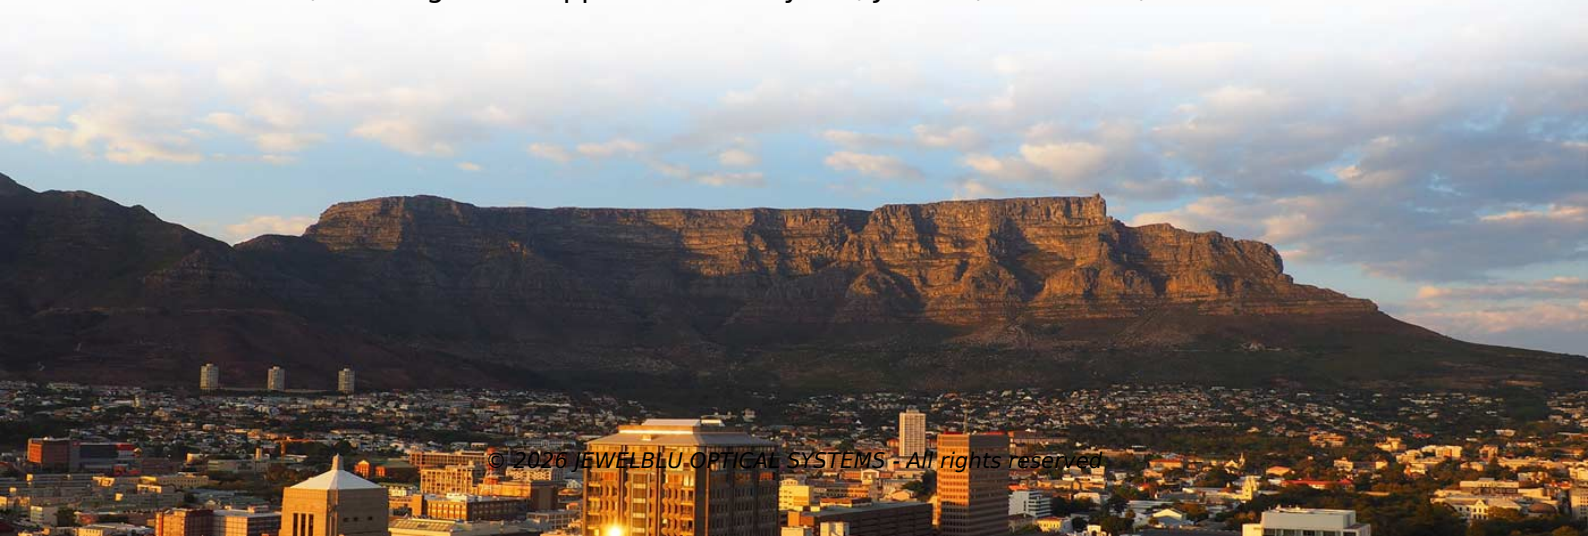

Schneider Electric cable trays offer a high grade of cable protection, shielding the cables from external influences.

Key Takeaways

Leading metal cable tray brands in Saudi Arabia include Matkel, ADHWA, Al Fareed Stars, MECSS, and Hitech Fence, offering a wide range of ladder, perforated, and wire mesh systems compliant with local and international standards.

Key Brands and Offerings

Matkel supplies engineered cable tray systems designed for extreme loads and harsh environments. Their products include ladder, perforated, and wire mesh trays made from hot-dip galvanized steel and FRP for corrosive zones. They comply with SASO IEC 61537 and Saudi Electrical Code (SEC) Clause 5.14, with load ratings from 100kg/m to 400kg/m and widths from 100mm to 900mm. Matkel also provides custom bending options and zinc coatings exceeding 600g/m² for coastal corrosion resistance, with logistics support across Riyadh, Jeddah, Dammam, and NEOM .

ADHWA offers a broad line of high-quality cable tray systems for construction, electrical, and industrial applications. Their materials include aluminum, mill-galvanized steel, hot-dipped galvanized steel, stainless steel 304/316, and coated finishes such as painted, PVC, powder, and epoxy. ADHWA provides ladder and channel type trays suitable for power, control, and signal cables, with smooth radius fittings and solid side rail protection .

Al Fareed Stars is a trusted Saudi manufacturer producing ladder, perforated, wire mesh, and custom cable tray designs. They also manufacture steel boxes, junction boxes, and cable support accessories. Their products are ISO 9001 certified and widely used by government ministries and major contractors. Al Fareed Stars emphasizes durability, safety, and compliance with industrial standards .

MECSS (Middle-East Cable Support Solutions) has over 20 years of experience manufacturing cable trays, ladders, trunking, and other cable support solutions. They focus on providing robust and reliable systems for industrial and commercial projects .

Hitech Fence supplies heavy-duty cable tray systems engineered for industrial plants, substations, warehouses, and large MEP projects. Their trays are available in GI, hot-dip galvanized, and powder-coated finishes, designed for outdoor, coastal, and desert environments, ensuring long-term durability under extreme temperatures and UV exposure .

Considerations for Selection

- **Material:** Choose galvanized steel, stainless steel, or FRP depending on environmental conditions. Coastal or corrosive areas may require FRP or SS316L.
- **Load Capacity:** Match tray ratings (light, medium, heavy) to total cable weight plus a safety margin.
- **Compliance:** Ensure products meet SASO IEC 61537 and SEC Clause 5.14 for installation and grounding.
- **Customization:** Many suppliers offer custom bending, widths, and configurations for complex plant layouts.
- **Regional Support:** Consider suppliers with logistics and technical support in your project location.

These brands collectively cover a wide spectrum of industrial, commercial, and infrastructure needs, providing reliable, standards-compliant metal cable tray solutions in Saudi Arabia.
