

Small square to large square single-mode pigtail

Overview

This bend-insensitive SC-to-SC fiber optic patch cable is meticulously designed and manufactured for a wide range of applications, including Fast Ethernet, Fibre Channel, Gigabit Ethernet, data centers, building cabling, campus networks, Local Area Networks (LANs), Storage. This bend-insensitive SC-to-SC fiber optic patch cable is meticulously designed and manufactured for a wide range of applications, including Fast Ethernet, Fibre Channel, Gigabit Ethernet, data centers, building cabling, campus networks, Local Area Networks (LANs), Storage. Fiber optic pigtails are designed to support fusion and mechanical splicing for fibre cabling systems. They provide a fast way to make communication devices in the field. The bend-insensitive fibre optic pigtails have less attenuation when bent or twisted than traditional fibre optic pigtails. The pigtail are designed to operate over a wide range of wavelengths, ranging from 1310nm - 1550nm for singlemode fiber with guaranteed low loss and reliability. PPC pigtails are offered in wide variety of connectors for singlemode fiber. Thanks to this solution, the phenomenon of modal dispersion is eliminated, so that single-mode fibers, unlike multimode fibers, have a greater bandwidth and allow data transmission over long.
