

Specifications of optical cable outer sheath extruder

Overview

Optical Cable Sheath Extrusion Line An optical cable sheath extrusion production line is a specialized set of automated industrial equipment used for extru.

Key Takeaways

An optical cable outer sheath extruder is designed to coat optical cable cores with protective polymer sheaths, offering precise control over diameter, thickness, and material properties. Core Function

The extruder continuously melts and applies polymer materials such as PE, PVC, LSZH, TPU, LDPE, MDPE, or HDPE onto the optical cable core, forming a uniform protective layer that provides mechanical protection, electrical insulation, and identification markings for the cable .

Key Specifications

- Finished Outer Diameter: Typically ranges from 2.8 mm to 35 mm, depending on cable type and extruder model .
- Extruder Screw Diameter: Commonly 90 mm or 120 mm, with precision screw and barrel systems for uniform extrusion .
- Cable Types Supported: Central tube, stranded, ribbon, loose tube, parallel twin wire, and medium messenger aerial cables .

- **Production Length:** Continuous extrusion up to 40 meters or more, with high-speed take-up systems .

- **Material Compatibility:** Supports single or composite sheaths, including PE outer sheath, aluminum-plastic compound belts, steel-plastic compound belts, and PE composite sheaths .

Control and Automation

- **Temperature Control:** PID smart controllers (e.g., Omron) ensure precise polymer melting .

- **Tension Control:** Advanced double-wire tension controllers prevent core damage during extrusion .

- **PLC and HMI:** Industrial PLCs with color touchscreens (Siemens or equivalent) allow real-time monitoring, parameter adjustment, and fault diagnostics .

- **Precision Parameters:** High accuracy in sheath thickness, outer diameter, concentricity, and adhesion .

Auxiliary Equipment

- **Pay-Off System:** Heavy-duty stands for smooth cable core release, with tension control to prevent fiber damage .

- **Core Straightening Devices:** Optional units to remove natural curvature from reels before extrusion .

- **Cooling and Take-Up Systems:** Water baths or air cooling, combined with large-capacity take-up reels for continuous production .

- **Optional Printing Units:** For cable identification, meter marks, and branding .

Performance and Reliability

- **High Efficiency:** Capable of long-length continuous production at high speeds .

- **Strong Adaptability:** Handles indoor, outdoor, direct burial, and aerial cables .

- **Mechanical Protection:** Ensures resistance to tension, crushing, impact, and bending during installation .

- **Electrical Insulation:** Especially important for metal-armored optical cables .

Brands and Components

- **Motors:** Siemens

- **Transducers:** Emerson

- **Bearings:** NSK or equivalent

- **Electrical Parts:** Siemens, Omron, Schneider

- **Screw and Barrel: Jinhu Company** This combination of precision control, material versatility, and robust auxiliary systems ensures that optical cable outer sheath extruders produce high-quality, defect-free sheaths suitable for a wide range of fiber optic applications.

Optical Cable Sheath Extrusion Line

An optical cable sheath extrusion production line is a specialized set of automated industrial equipment used for extruding one or

Optical Cable Sheathing Production Line

This document provides specifications for an optical cable sheath production line that can extrude inner and outer sheaths for optical

Mastering Optical Cable Sheath Extrusion:... | AIMIFIBER

An efficient optical cable sheath extrusion line is essential for producing reliable cables for

Optical Cable Sheath Extrusion Production

High-Speed Extrusion: Line speed up to 100m/min with actual speed of 80m/min for PE materials.

90 (120) optical cable sheath extrusion production line

This equipment can be used for loose tube punching oil gysts cable in the production of the inner and outer

Optical Fiber Cable Extrusion Line

One-stop sourcing solutions for fiber optic cables extrusion lines, including loose tube, tight buffer and cable sheathing processes.

90 Optical Cable Sheath Extrusion Line

Discover the 90 Optical Cable Sheath Extrusion Line for durable, high-quality cable coating, enhancing performance and longevity.

Optical Fiber Cable Extrusion Line

An optical cable extrusion production line, commonly referred to as an extrusion line or sheathing line, is an industrial production

Machine for Optical Cable Sheathing / Optical Cable Outer Sheathing ...

2. Optical fiber outer sheath: PE outer sheath and Aluminum plastic composite tape and PE composite outer sheath, Steel plastic

GYXTW Cable Sheath Extrusion Line/Outdoor Optical

GYXTW Cable Sheath Extrusion Line/Outdoor Optical Cable Sheathing Making Machine, Find Details and

2121106-4 | CommScope

Fiber Optic Outdoor 6 Fiber Unitube Cable with Corrugated Steel Armoring, OS2, with HDPE Jacket

Optical Cable Sheath Extrusion Line

Optical Cable Sheath Extrusion Line An optical cable sheath extrusion production line is a specialized set of automated industrial

13 common cable extruder classification and operation precautions

In the wire and cable industry, the extruder is mainly used to produce the insulation layer and sheath layer of wire and

Basic Requirements of Cable Extrusion Process

During cable extrusion process, the outer cable sheathing surface of the plastic wire and cable must be printed with

13.Technical Guide to Wire and Cable Extrusion Process

The wires are manufactured by coating the conductors with insulators via extrusion process to make a continuous profile. Co

6 Fiber Cable Outer Sheath Materials and How To Choose?

The main function of the fiber cable outer sheath is to protect the optical fibers in the optical cable from external damage.

Cable Extrusion Machine

Find more Cable Extrusion Machine, including Cable Extruder, Cable Extrusion Machine, Wire Extruder, Cable Extrusion Line,

Tight buffered fiber extrusion line-optical cable machine

This Optical fiber cable production line makes tight buffered fiber 0.6/0.8/0.9mm. Cable

Fiber Optic Cable Extrusion Line

Find more Optic Fiber Cable, including Fiber Optic Cable Extrusion Line, providing diversified solutions for wire and cable production

Power Cable Sheath Extruder Line

Power Cable and Wire Jacket Extrusion Line Our power cable jacket extrusion line is specifically designed for low to high-voltage

Understanding the Cable Extrusion Process: Your

An extruder is an essential device in manufacturing cable as it facilitates the formation of raw

Outer Sheath

Information package of the outer sheath process requirements Recommendation for the line lay-out arrangement and equipment

Mastering Optical Cable Sheath Extrusion:... | AIMIFIBER

Setting up an optical cable sheath extrusion line is a critical step in manufacturing robust optical cables designed to

Optical Cable Sheath Extrusion Production

Optical Cable Sheath Extrusion Production Line/Outdoor Armor Optical Cable Sheath Extruder, Find

Extrusion Process of Wire and Cable Production

The extrusion process includes both the insulation and sheath production process. The basic method of producing the plastic

Cable sheath extruder machine

Types of Cable Sheath Extruder Machines A cable sheath extruder machine is a vital piece of industrial equipment used to apply

Optical Fiber Cable Extrusion Line

An optical cable extrusion production line, commonly referred to as an extrusion line or sheathing line, is an industrial production

Machine for Optical Cable Sheathing / Optical Cable Outer Sheathing ...

2. Optical fiber outer sheath: PE outer sheath and Aluminum plastic composite tape and PE composite outer sheath, Steel plastic
