

Steps for switching the Cuba 10KV busbar for maintenance

Overview

With cross-tie disconnect “DT”, the power of line A can be switched to branch A1, bypassing the busbar. The busbars are then accessible for maintenance. Each branch requires only one circuit-breaker, and yet each breaker can be isolated without interrupting the power. MV Switchgears are developed, manufactured, and tested to switch, protect, and control alternating current systems ranging from 1 kV to 52 kV in accordance with the IEC 62271-200 standard.
