

Warranty for OSFP optical modules QSFP-DD

Overview

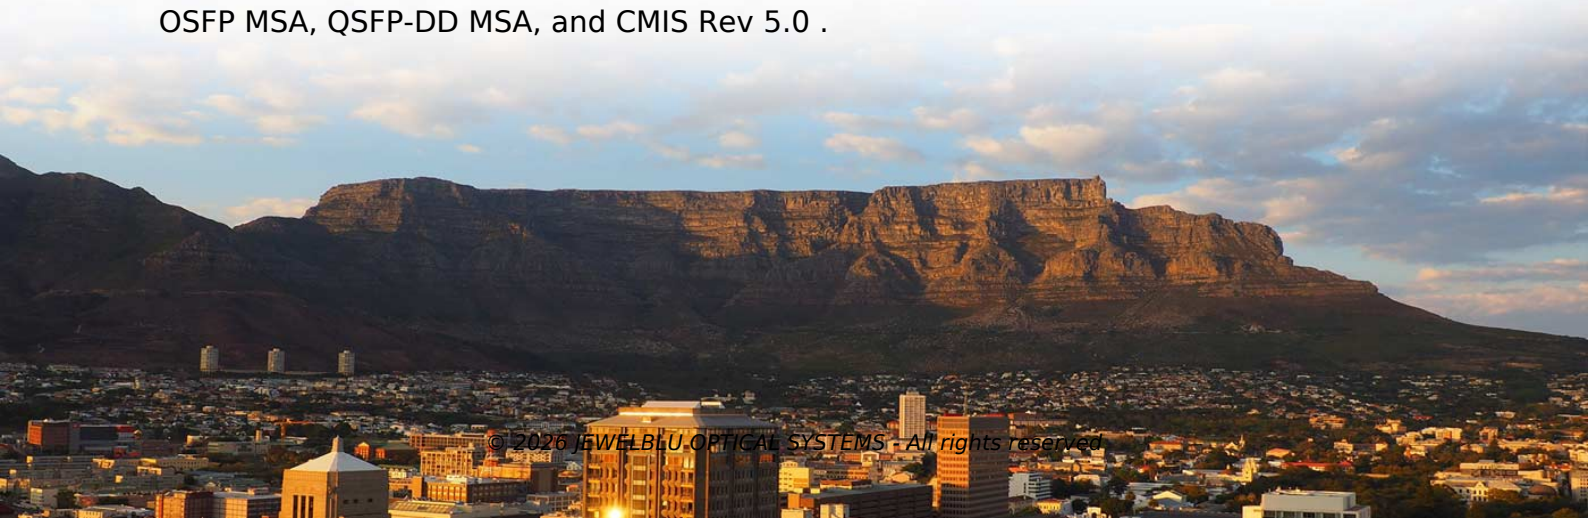

Cisco QSFP-DD and OSFP 800G ZR/ZR+ Coherent Optics ModulesThe Cisco 800G QSFP-DD coherent optics modules are mechanically compliant with the QSFP-DD Multi.

Key Takeaways

OSFP and QSFP-DD optical modules typically come with a limited manufacturer warranty, often ranging from 1 to 5 years, covering defects in materials and workmanship under normal use.General Warranty Coverage

Most high-speed optical modules, including OSFP and QSFP-DD 800G modules, are covered by a limited warranty provided by the manufacturer. This warranty generally includes:

- Defects in materials or workmanship: The manufacturer will repair or replace modules that fail due to manufacturing defects.
- Compliance with specifications: Modules are warranted to meet the stated optical, electrical, and mechanical specifications, including standards such as IEEE 802.3ck, OSFP MSA, QSFP-DD MSA, and CMIS Rev 5.0 .

- Digital Diagnostics Monitoring (DDM/DOM): Warranty may cover failures in monitoring functions that affect module performance .

Typical Duration

- Cisco OSFP/QSFP-DD modules: Cisco generally provides a 1-year limited warranty for optical transceivers, with options for extended support contracts for longer coverage .

- FS Optical Modules: FS 800G OSFP/QSFP-DD modules usually come with a 1-year warranty, with replacement or repair for defective units within that period .

- Other Vendors: Many vendors, including TE Connectivity and Connlight, offer warranties ranging from 1 to 3 years, depending on the product line and purchase agreement .

Warranty Limitations

- Improper use or installation: Damage caused by incorrect handling, installation, or operation outside the specified environmental conditions is typically not covered.
- Physical damage: Breakage of connectors, fiber, or module casing due to mishandling is excluded.
- Third-party modifications: Modules altered or repaired by unauthorized parties may void the warranty.

Best Practices

- Register products: Some vendors require registration to validate warranty coverage.
- Keep purchase records: Retain invoices and serial numbers for warranty claims.
- Follow MSA standards: Ensuring modules are used in compliance with OSFP/QSFP-DD MSA and IEEE standards helps maintain warranty eligibility . In summary, OSFP and QSFP-DD optical modules are generally backed by a limited manufacturer warranty of 1–5 years, covering defects and compliance with specifications, while excluding damage from misuse or unauthorized modifications. For precise terms, it is recommended to consult the specific vendor's warranty documentation at the time of purchase.
