What model of the YT column cabinet is it

Overview

Revisions made to this document are indicated with a line along the left or right hand column in the area the revision was made.

Key Takeaways

The YT column cabinet is most likely the YT-0914 Roller Cabinet with 7 drawers.

The YT-0914 Roller Cabinet is a versatile storage solution designed for workshops and garages, featuring seven spacious drawers lined with foam and mounted on ball-bearing guides for smooth operation . It is constructed from durable steel sheet, has a tabletop lined with oil-resistant rubber, and is equipped with large rubber wheels, including two swivel casters with protection, allowing easy mobility even when fully loaded. The cabinet can withstand heavy loads up to 300 kg, making it suitable for professional mechanics and DIY enthusiasts .

Key Features of YT-0914

- Number of Drawers: 7, providing ample storage space for tools and equipment .
- Material: Durable steel construction with foam-lined drawers and oil-resistant rubber tabletop .
- Mobility: Four smooth-rolling casters, two of which swivel, for easy movement .
- Load Capacity: Up to 300 kg, suitable for heavy tools and workshop equipment .

- Design: Compact and practical, ideal for maintaining an organized workspace .

Comparison with Other YT Models

- YT-55299: This model has 6 drawers and slightly different dimensions, making it less spacious than the YT-0914 .
- Other YT Cabinets: YT Industries offers various technical documents and manuals for other cabinet models, which can be referenced for further identification if needed . If your cabinet has seven drawers, foam-lined interiors, and large rubber wheels, it is almost certainly the YT-0914 model. For additional verification, you can check the product label or consult YT Industries' technical documents.
